

Best Practice for waste disposal...

- **Why throw it away when you can re-use it? The colour will be softer and have less texture the second and third time around.**
- **Throw the waste down the drain. The municipal sewerage system is equipped to handle the small quantity that you produce.**
- **Do not throw concentrated dye in the garden or down a septic tank.**
- **The rinsing water from washing out the fabric can be let out on your garden, as long as the dye waste is very diluted. Use less soap to rinse with if you plan to let this water out onto your garden.**
- **Dye waste may stain a porcelain sink, stainless steel is better.**
- **Do not use a pot that you have used for dye for cooking food.**
- **The salt and fixative are corrosive and will rust certain metals.**
- **You can scrub the stains from your hands or use bleach.**
